

CIEH Environmental Policy

CIEH is one of the world's leading public health organisations. It advocates and campaigns for a better quality of life for all; sets and maintains the highest standards of professional practice for its members; provides high quality, internationally recognised, training qualifications and events; and provides one of London's leading sustainable venues for conferences and events.

Our vision is to lead, inspire and deliver a safer, cleaner and healthier world.

Our mission is to promote effective environmental health practice.

As a leading professional environment health organisation we fully recognise the importance of a clean, healthy and sustainable natural environment in protecting and enhancing human health and wellbeing.

We also recognise that as an organisation our day-to-day activities impact on the environment. To mitigate these impacts we have implemented a documented management system which applies to all operations and services in our UK offices.

CIEH is committed to and will ensure:

- Continual improvement in our environmental performance
- Preventing pollution through implementing a management system with objectives and targets and this policy sets out our approach to doing so
- Compliance with all relevant environmental legislation and other requirements to which CIEH subscribes which relate to our environment aspects

In addition to our commitments above, we will further:

- Improve resource consumption efficiency within the organisation by setting targets to reduce our use of energy and water
- Minimise our waste by reduction, re-use and recycling
- Monitor and review our arrangements for waste recycling and disposal to ensure that all waste is properly handled, recycled and disposed of in accordance with current legal requirements and best practice
- Build on our work to ensure that all necessary business travel is carried out using the most environmentally sustainable modes of transport
- Educate, train and motivate employees to carry out tasks in an environmental practice among our key stakeholders, suppliers and subcontractors
- Work to become a beacon of environmental best practice

This environmental policy will be regularly reviewed as part of our environmental management programme.

We will communicate this policy to all our employees and contractors and it is available for the public on our website.

Signed:

Date: 03rd March 2017

Anne Godfrey
Chief Executive
